

Momento

Ria Singh & Anika Bhatnagar

Project Description

- ❖ *Momento* is a visual journaling app focused on photos and mood tracking.
- ❖ Users capture daily moments with images, moods, and quotes.
- ❖ Features include vintage photo filters, mood check-ins, and monthly recaps.
- ❖ Designed for creative thinkers and busy individuals seeking quick, visual journaling.
- ❖ Perfect for reflecting on emotions and preserving meaningful memories.

User POV

Home Screen: Simple layout with options for daily photo capture, mood check-in, and viewing archives.

Daily Photo Capture: Tap a button to take a photo, apply a vintage filter, and save it to the journal.

Mood Check-in: Select a mood from icons or emojis to pair with the photo.

Daily Quote: Automatically displayed with each entry for inspiration.

Monthly Recap: Access a visual summary of moods and moments via a menu option.

Archives: Organized by month for easy browsing of past entries.

Why we chose Momento . .

- ❖ Focuses on aesthetics and meaningful design to create a visually engaging app.
- ❖ Encourages users to capture emotions in a creative and personal way.
- ❖ Allows us to craft a tool that resonates with creative individuals seeking a unique journaling experience.
- ❖ Offers the opportunity to blend functionality with an artistic approach, making the project deeply rewarding.
- ❖ We chose this project because it aligns with our passion for creating meaningful, personal, and impactful solutions.

Technologies

SwiftUI: For building a modern and intuitive user interface.

- ❖ *Experience:* Gained from prior coursework and previous development of Momento.

Firebase: To manage secure data storage for photos, mood entries, and quotes.

- ❖ *Experience:* Successfully implemented in earlier iterations of the project.

API/Preloaded Database: For the Daily Quote Generator feature.

- ❖ *Experience:* Limited but confident in integrating a lightweight API or preloading data.

Xcode: As the primary development environment.

- ❖ *Experience:* Extensive use during previous iOS projects.
